

CPE 551 WS

ICE 0

Name: Joris Wilson

1. Computer Engineering.
2. Become more proficient in python, and more independent with coding. I have taken SSW 215 which is an individual programming course and there was some python, but not enough for me to consider myself proficient in the language.
3. During my free time I enjoy biking in Hoboken and NYC. I participated in the TD Five Boro Bike Tour last year, and I look forward to participating again this year on May 6th.
4. We are using GitHub in this course because saving our files to the provided templates will make it easier for grading for our TA, Deep.
5. We will be using Jupyter Notebook in this course because of its interactive capabilities. Instead of having Prof. Ryan reading off the slides, we can all be in the interactive notebook learning and practicing with the syntax
